Our members and staff's safety are our priority. Fire evacuation drills need to be done regularly. We organised three drills in August.

The new art activity in August was painting on black paper. We didn't know we had so many talented members. We took on the next level in colouring pictures. As well as colouring in, this time we also creatively completed the Fashion Design pages by using different colours and patterns. The members made each project unique. In the woodwork workshop the new project is making photo frames.

Beads, necklaces, bracelets are back for the ladies. Nail care and polishing with gossiping is a delightful activity. All the ladies had lots of laughter and smiles on those days. Besides the fun both activities stimulate creativity and other skills.

Magnolias are flowering in the gardens in all area. At the Botanical Garden the different coloured magnolias make the area just like a Fairy Garden.

We put lots of effort into providing nice, nutritious meals for the members every day. Everybody enjoys the different variety of vegetables and meat. One of the member's favourite meals are pies. It looks yummy and tasty too.

One of our new member plays the harmonica. His playing makes everyone happy. Thank you!!

We are regularly organising shopping experiences for our members. These outings are not just enjoyable activities, but are also very useful because it refreshes the memory and is an opportunity to catch up with new things. Visiting Spotlight is also a good place to collect new ideas for activities.

We love to be here

Warm Regards from the Marsden Club
